

2009 Racing Tip # 2 – Spider and Spider Jam Nut Torque, Recoil Rope, and Brake Maintenance

Spider and Spider Jam Nut Torque

Check the drive clutch spider and spider jam nut torque as per the procedure and specifications listed in section 6 of the 2009 600 IQ Racer Service Manual.

Recoil Rope

To avoid recoil rope fraying and/or breakage, check the recoil rope guide located under the console to be sure it is flared out enough to prevent the outer edges from coming in contact with the recoil rope.

Brake System Maintenance

Due to the excessive use of the brakes required in snocross racing. It is advisable to inspect the condition of the brake pads, brake rotor, flush and replace the brake fluid, and bleed the brakes after each race weekend. Use Polaris P/N 2872189 D.O.T.4 brake fluid.
