Dear Polaris Racing Customer:

Thank you for purchasing a 2007 440 IQ. We appreciate your commitment to Polaris and wish you well in the upcoming race season! The purpose of this letter is to inform you of some incorrect information included on a hang tag that was attached to the fuel tank filler neck on your snowmobile.

The subject hang tag has been placed on every 440 IQ built since the 2005 model year. The hang tag states that *"for consumer use with 92 octane fuel you must install a low compression head (PN 2202188)."* This hang tag was intended to be eliminated for the 2007 model year due to changing EPA emission regulations.

Under the EPA regulations, the 2007 440 IQ is approved for competition use only. Any use of the 2007 440 IQ for general consumer applications is strictly prohibited by EPA regulations.

We apologize for any inconvenience this error has caused you, and we look forward to seeing you in the winner's circle this season!

Best Regards,

The Polaris Racing Team
